Art Unit: 2836

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-69 are still provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of copending Application No. 09/751,868. Although the conflicting claims are not identical, they are not patentably distinct from each other because differences between the two sets of claims are unremarkable design variations well within the abilities of persons of ordinary skill in the art of solenoid controlled devices.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Applicant's arguments, see remarks, filed 11-3-03, with respect to claims 46 and 47 have been fully considered and are persuasive. The USC 102 rejection of claims 46 and 47 has been withdrawn.

Applicant's arguments filed 11-3-03 with respect to the provisional double patenting rejection of claims 1-69 have been fully considered but they are not persuasive. Application number 09/751,868 has received a Final rejection from the

examiner (Mr. Toatley), but is not yet abandoned and could still become a U.S. patent. A terminal disclaimer will be required as stated in the last office action during all times that 09/751,868 is pending.

This action includes the IDS 1449's that were not mailed in the last action.
